DETAILED ACTION

1. Applicant's claims submitted 9/15/2005 are non-compliant to the requirements of 1.173(g) which requires underlining of insertions and bracketing of all deletions, this includes complete underlining of all claims not included in the originally patented claims as in the claim set of 10/6/05 which was acceptable.

Response to Amendments / Arguments

2. The new declaration is not acceptable.

The statement of error is insufficient. It is stated "it would be desirable to include independent claims which ...," but the statements of error do not state which independent claim(s) have been added to overcome the error.

3. Applicant's amendments to the claims overcome the recapture rejection.

4. The original patent has been surrendered and is artifact file 09654929za.

5. New corrected drawings in compliance with MPEP 1413 have been received for figures 2 and 7.

6. A discussion of the support in the specification for all functions of all the new claims has not been provided as required by 37CFR 1.173(c), a discussion of some of the functions has been included in the most current amendment, but not all functions were supported.
